EDUCATION

Bachelor of Technology (CSE) Lovely Professional University

08/2019 - 07/2023

CGPA: 8.62

Coursework

- DBMS
- Data Analysis
- Advanced Mathematics
- Python

PROJECTS

Chatbot: Dialogflow, FastAPI, and GitHub in Action (08/2023 - 08/2023) [↗](#)

- Designed and developed an **interactive chatbot** that streamlined the process of 2 main components, i.e., food ordering and order tracking.
- Crafted 8 conversational flows for ordering and tracking using **Dialogflow intents and fulfillments**.
- Implemented a robust backend using **Python and FastAPI** to efficiently process user requests.
- Created 2 SQL database structures for storing food items, order tracking, and order status.

Road Accident Analysis Dashboard (05/2023 - 05/2023) [↗](#)

- Conducted an in-depth analysis of the dataset, identifying and highlighting 5 **significant trends** within the road accident data.
- Utilized **advanced data visualization techniques** in Tableau to present the identified trends in a clear and intuitive manner.
- Generated 5 **different aggregates to summarize key statistics** and metrics related to road accidents, providing stakeholders with valuable insights.

Google Play Store Analysis (12/2021 - 12/2021) [↗](#)

- Built a **comprehensive and interactive dashboard** using Excel for analyzing Google Play Store apps based on various categories.
- Created 7 **interactive charts and visualizations** to present critical observations.
- Ensured accuracy and dependability by performing data cleaning and preprocessing. Cleaned the raw data 100% for precision.

WORK EXPERIENCE

Software Engineer Intern Frugal Testing

06/2022 - 05/2023

Hyderabad, India

Achievements/Tasks

- Constructed and developed automation frameworks for 4 different projects, resulting in a significant reduction in manual testing efforts.
- Performed functional testing to validate software functionalities and ensure compliance with user requirements.
- Contributed to enhancing testing processes, methodologies, and best practices, resulting in a 30% increase in testing efficiency.
- Collaborated with stakeholders on 4 projects, optimized testing methodologies using data analysis, and actively participated in cross-functional teams for continuous improvement.

SKILLS

Python

SQL

Tableau

Google Cloud

Power BI

Looker Studio

Excel

Data Structures

C++

HTML

CSS

JavaScript

NLP

ACHIEVEMENTS

3 Stars on Leetcode (03/2022)

3 STAR coder at Code Chef (08/2021)

Jumpstart Hackathon Finalist (07/2021)

Ranked top 63 in the world on Hackerearth programming (04/2021)

5 STAR Coder at Hacker Rank (02/2020)

CERTIFICATIONS

Career Essentials in Data Analysis by Microsoft and LinkedIn (06/2023) [↗](#)

Advanced SQL Certificate by HackerRank (04/2023) [↗](#)

Modern Big Data Analysis with SQL Specialization (06/2021 - 07/2021) [↗](#)

DSA Self paced course by GFG (06/2021 - 07/2021) [↗](#)

Crash Course on Python by Google (05/2020 - 05/2020) [↗](#)

Problem Solving Certificate by HackerRank (10/2020 - 10/2020)
